Receipts of Live Stock at the Union Stock Yards during the past 24 hours-26 Cattle, 1,005 Hogs. Shipments-87 Hogs.

Cattle receipts today were small. There was not much doing in the cattle alleys owing to the small receipts. The market was strong on good grades of cattle, but common and medium stuffs only found sale at poor prices. There is a fair demand for good butcher cattle, stock and feeding steers at all times, and such stock will bring fair prices. Good cows and helfers sell for \$2.30/21.60; stock steers, 700 to to 800 pounds, \$2.65/22.85; feeders, 900 to to \$800 pounds, \$2.65/22.85; cappers \$0.75/2 1.00. The market closed strong on good

The run of hogs today was fair. The market opened active but 25/625 cents. and closed 5@10 cents lower than yesterday's close. There were not near enough hogs to supply the demand, as several hundred more were wanted by local purchasers. There were few small hogs in soday, the bulk of offerings consisting of fair to good packing hogs. Tops today brought \$3.45, bulk \$3.35@5.40, pigs and lights \$2.10@23.80. The market closed active and firm at the decline.

St. Louis to Colorado via Wichita. Commencing Sunday, July 13,1890, the Missouri Pacific railway will run through sleeping cars from St. Louis via Pleasant Hill, Rich Hill, Fort Scott and Wichita to Hill, Rich Hill, Fort Scott and Wichita to Genesco and from thence to Pueblo, Colorado Springs and Denver. This change was made on account of a great many people from the east going to Colorado being desirous of going via Wichita. The train will stop here two hours, giving all a chance to view the "Perless Princess" and still land passengers in Colorado same time as if they had gone via Kansas City It also gives the citizens of Wichita sleeping car service from here to Colorado. Returning, it gives us through sleeping car service Wichita toSt. Louis, and gives the Colorado people a chance to go east via Colorado people a chance to go east via Wichita. This change will undoubtedly be appreciated by the traveling public, and especially by the citizens of Wichita. If you are going east or west go via the popular new through route. Passenger and Ticket Agt. Wichita, Kansas. No One Need Drown Now. An Italian has just arrived in London with an "instantaneous, self expanding, life saving belt," by which he expects to enrich himself from the pockets of the people who are nervous at sea. It has already been adopted by the principal steamship companies of Italy. The unique feature of this new life saving belt is that it may be worn around the body while promenading about the decks during the day, and is not even taken off in bed. It weighs about twice as much as one of the ordinary canvas or

leather belts sold for general use. In its finished state it is about the last thing in the world that a prudent man would place confidence in if he was to stempt to jump for his life from the deck of a sinking vessel into the sea. But the moment the belt touches the water two chemical substances contained in it are instantly united, and it begins to inflate with gas. What these substances are is the inventor's secret. He claims that one belt will keep the most heavily clothed person affoat for fortyeight hours. For ladies the belts are in the middle of the page he licked it down made of silk, for men of canvas.-Boston Transcript.

Untruthfulness in Courts of Justice. The judge of Birmingham county ourt is driven to despair by the untruthfulness of the parties who come before him. In commenting on a case the other day he declared that this was the fifth instance that morning in which more or less respectable persons had been guilty in the witness box of "the most deliberate lying." To such a pass have things now come that he described himself as going home sick at heart, day by day, from hearing people give each other the lie direct in matters about which there could be no possible mistake. Happily the state of things at the local quarter sessions is not quite so bad, though according to Mr. Neale, the recorder, it is bad enough.-London Tit-Bits.

A new flashlight fire alarm has recently appeared in Copenhagen. It consists of a small cartridge filled with Bengal light composition and provided with a fuse which carries a small capsule of strong sulphuric acid. When the temperature of the room rises above the acid is liberated and ignites the fuse which in turn sets fire to the Bengal light. The device can be seen by melting point of paraffine the sulphuric which in turn sets fire to the Bengal light. The device can be supplemented by a piece of fusible metal which in melting will establish an electric current melting will establish an electric current to the first of the first o
